Higher fees for PTB's metrological services

Dear PTB Customer,

Costs and increasing fees are not pleasant topics but unfortunately, metrological services at the highest national and international level have their price.

With this letter we would like to ask for your understanding for us significantly increasing the fees for our metrological services after 10 years – in some areas even drastically. For the most part, the increased fees are due to inflation; however, they can also be traced to the fact that in the last few years we have invested significant sums in our measurement technology equipment, in order to meet the increasing demand for ever more precise calibrations and tests in increasingly larger measurement ranges and for new measurements. For details, please read the information at our website at:

<https://www.ptb.de/cms/metrologische-dienstleistungen.html>.

I am very much hoping that you will understand our need to increase the fees and hope that you will be able to continue your cooperation with PTB. In return, I promise you – as always – highest-quality metrological services with impressive accuracy.

Yours sincerely,

Representing the President of PTB

Honorary Professor Dr. Roman Schwartz
Vice President
