

Calibration and Measurement Capabilities of PTB in the field of Acoustics, Ultrasound and Vibration

In this document the calibration and measurement capabilities are documented which PTB offers as a world-wide service. A part of these capabilities is listed in the calibration and measurement capabilities (CMC) tables of the Bureau International de Poids et Mesures (BIPM) and offers them under the auspice of the Mutual Recognition Arrangement (MRA). All CMCs can be found at the BIPM website <https://kcdb.bipm.org/appendixC/default.asp>.
