

Working Group 3.32 "Properties of Liquids"

Calibration of capillary viscometers

Measurement of the density of liquids

Measurement of the viscosity of liquids

On demand PTB is performing calibrations of capillary viscometers.

We can do measurements of the density and the viscosity of liquids in a wide temperature range.

Before you are asking PTB, please check, if it is possible to do these calibrations and measurements at calibration laboratories accredited by Deutsche Akkreditierungsstelle GmbH (DAkkS) or by Deutscher Kalibrierdienst (DKD). The uncertainty offered by these institutes is sufficient for most of applications, but the costs are much lower than at PTB.

Nevertheless, if you wish to get a measurement from PTB, please contact:

Physikalisch-Technische Bundesanstalt
Working Group 3.32 "Properties of Liquids"
Postfach 33 45
38023 Braunschweig
Germany

Phone: +49 531 592 -3141 (Dr. Jürgen Rauch)

Fax: : +49 531 592-693320

E-Mail: kundeninfo332@PTB.DE

The fee is calculated according to the working time necessary for the measurement. It is charged in accordance with the » Regulations Governing Charges for Services Supplied by the Physikalisch-Technische Bundesanstalt«

(<http://www.ptb.de/cms/en/fachabteilungen/abt/z14/information-on-ptb-fees.html>)

and is subject to change.
