

## Start of NEPSI @ PTB

This July, PTB and NEPSI signed an agreement to set up a NEPSI office on PTB's premises in Braunschweig (Germany) to provide an easy contact possibility for European manufacturers seeking access to the Chinese market. This is one of the important parts of strategic cooperation between PTB and NEPSI.

Oct. 1<sup>st</sup>, 2015, NEPSI @ PTB starts to operate. This office will provide local consult for entry to Chinese market, explosion protection certification, pattern approval of measuring instruments (CPA), etc., and provide local NEPSI certification service. The officer could conduct documents review, sample inspection and initiation of certification etc. locally. This will facilitate the certification process, and the exchange of information and save time to place the products to Chinese market.

**This will be beneficial to both European manufacturer and Chinese end user.**
