Title of measurement

Description of measurement (please use back of application letter)

The detailed description of the measurement at our core facility should illustrate in addition to the details of the magnetic measurement also necessary tools for the measurement, the number of samples, the goal of the measurement, planned usage of the measurement data (scientific or industrial usage) and the scientific background (please add references).

Planned modalities

Magn. Shielding Magn. Sensors Magn. material MEG

Magn. nanoparticle ULF NMR/MRI Spin precession

User group

University Metrological Institute Industry
Research Institute designate Institute

Estimated length of measurement (in h or days)

Estimate starting date

I have read the user rules and I accept it.

.....

City, Date

.....

Signature of applicant

Respectively scientific adviser of students
